

DIDSBURY PIONEER

VOL. XXXV, No. 21

EDMONTON, ALBERTA, THURSDAY, MAY 26, 1938

\$2.00 per Year. 5 Cents a Copy

To Make Arrangements for Didsbury Fair.

A meeting of the directors of the Didsbury Agricultural Society will be held Tuesday, May 31st, to make arrangements for the fair which will be held on Wednesday, July 29th.

Organize Girl Guides.

It was decided to sponsor the organization of a group of Girl Guides and Brownies at a meeting of the I.O.D.E. held at the home of Mrs. C. R. Ford on Friday afternoon.

Mrs. R. Bishop, of Calgary, provincial organizer of the Girl Guides, was present and described the methods of organization and afterwards spoke to the girls at the school.

Mrs. R. G. Ady was appointed to organize the Girl Guide and Ranger groups and Miss Rena Mowers will organize the Brownies.

Didsbury Wins Softball Tourneys

Both the Didsbury Boys' and Girls' softball teams got into the money at the Olds May 24th celebration.

The Didsbury Boys landed first place and a purse of \$25 when they beat Melvin easily in the final 16-0.

The first round they won by default, Innisfail failing to put in an appearance. They beat Calgary Bankview in the second round 9-5 and took the final against Melvin.

The lineups in the final were: Didsbury—R. Ferguson p; Jay Tugle c; Hank Morasch 1b; Roman Holub 2b; Fred Evans 3b; Ronnie Brightman cf; V. Ferguson, ss; Goldie Gabel rf; Ray Shantz lf.

Melvin—Lester Krebs p; Bill Wagner c; Calvin Shannon 1b; John Landeen 2b; Allen Krebs 3b; Don Shannon cf; Leo Weige rf; Norval Honey lf.

The High School Girls took second place and a purse of \$10 in the girls' tourney, losing to Crossfield in the final.

In the first round they beat Garfield by two runs and also beat Carstairs by a couple of runs in the second round, but lost to Crossfield in the final stanza 28-21.

The High School Girls' lineup was Betty Boorman, Joan Woods, Marge Burns, Grace Topley, Vera Sinclair, Dorothy Hehn, Dorothy Thomas, Jo Booker, Mildred Leuhr, Margaret Thurlow and Marie Lumsden. Lloyd Jenkins was the coach.

New Manager at Atlas Yard

Dick Wallace, who has been transferred here to take charge of the Atlas Lumber Co.'s yard, arrived last weekend.

Mr. Wallace who came here from Airdrie, has been with the company for the past ten years, commencing in Calgary, and had charge of the Airdrie yard for some time. He is anxious to get acquainted with the customers of the yard and the public generally and invites them to call in at his office any time.

Circulate Petition Re. Highway

Not satisfied with the decision of the government to take the highway south from the Rosebud School, it was decided to petition the premier of the province to have the road come through or touch the town on the east side, eliminating the railway crossing.

The petition has been circulated in town, with about 100 per cent signed up. When the country has been thoroughly covered, the petition will be presented.

Knox United Church Notes.

The services next Sunday will be in charge of the minister who will address the congregation on the topic "Echoes of the Conference." Owing to the cancellation of the services in the country last Sunday, the sermon topic for Westcott and Westerdale will be "The Man Who Changed a Century." A hearty invitation is given to all.

Evangelical Church Annual Meeting

The annual meeting of the Evangelical Church was held in the church basement Tuesday evening, May 17th.

The ladies served a delicious supper to all members and adherents of the Church, which was greatly appreciated by those present. Quite a number were absent due to condition of the roads.

Following the supper the meeting was called to order by the pastor, Mr. H. M. Reiber acting as secretary. The following officers were duly elected:

Treasurer, J. V. Berscht
Recording Sec., H. M. Reiber
Missionary Treas., M. B. Clemens
Building Fund Treas.,

W. E. Rieder
Messrs. E. A. Deadrick, J. L. Tuggle and W. E. Rieder were re-elected church trustees.

Dr. H. C. Liesemer was elected organist for the evening services and Miss Mildred Deadrick for the morning services, with Miss Lila Wrigglesworth as assistant.

The various departments of the Church gave their reports and all are in fine condition. There is a good attendance and interest in every department, and each society showed a surplus financially.

The pastor's salary and all expenses of the Church are met in full, and \$250 paid off the Church debt. The financial position is \$350 better today than a year ago. Considering the year this is a very creditable report.

H. A. Craig Leaves Post.

H. A. Craig, for the last 23 years deputy minister of agriculture, was retired from the provincial government over the weekend, it was learned on Monday. He had recently returned from two months' leave of absence during which time he visited Honolulu. Troubled with his eyes, Mr. Craig had sought improved eyesight.

He returned to his office a little more a week ago and his retirement was made effective over the weekend. He had served in the capacity of deputy minister under three governments, the Liberal, U.F.A. and Social Credit.

East Districts Protest Highway

A largely attended meeting was held at Community Hall on Monday when farmers from east of Didsbury, Olds and Carstairs met to protest against the proposed routing of the new highway.

Mr. Hugh Roberts acted as chairman, and consensus of opinion at the meeting was that the highway should follow the first proposed route, namely, one mile west of the 5th meridian.

The following resolution was unanimously passed:

"That we are absolutely opposed to the route proposed for the new highway and we request you to follow a straight line on the old survey one mile west of the 5th meridian.

If the government does not see its way clear to grant our request, in our opinion it would be much better to follow the old highway, serving all towns."

Petitions will be circulated and will be accompanied by a delegation to Edmonton, if the delegation can get a hearing by the government.

Showered.

Miss Lucille Smith was guest-of-honor at a surprise party and kitchen shower given at her home on Saturday evening by the Misses Dorothy Ranton and Lila Wrigglesworth. About 25 guests were present.

The gifts were brought in on a pink and white decorated wagon by Yvonne Ford and Eddie Lunt, dressed as bride and groom.

The Mission Circle of the Evangelical Church entertained Miss Dorothy Tuggle at a miscellaneous shower at the home of Mrs. J. V. Berscht on Friday evening, about 45 guests being present.

The guest-of-honor was recipient of many beautiful gifts which were wheeled in on a prettily decorated tea wagon.

Howard Halliday and Al Thomas motored to Turner Valley and Little Chicago on the 24th.

Farewell Party to Mrs. Wallace.

On Monday evening a number of ladies of the Knox Church Ladies Aid made a surprise visit on Mrs. G. A. Wallace to give her a farewell shower.

Mrs. Wallace, during her six years' residence in Didsbury, was a very active member of the Ladies' Aid and the ladies deeply appreciate the good work she has done. They expressed their regrets on her and her family leaving the district and wished them success in their new home. She was the recipient of many farewell gifts from the ladies.

Mrs. Wallace and children will leave for Coronation this week end, Mr. Wallace having gone to that point on Monday last.

BIG BEN
The PERFECT Chewing Tobacco

A Dwindling Asset

One can imagine the consternation that would be created in Western Canada if it were predicted that the time is coming within the ken of the present generation when the prairies and the foothills of the Rocky Mountains will be denuded of much if not all of its feathered and furred life; when a game bird would be literally a *rara avis* and when the appearance of a fur-bearing animal would be so uncommon as to occasion a newspaper paragraph.

To many people such a prospect is unthinkable and to all lovers of nature and the great outdoors such a possibility is almost too painful to mention, yet there are evidences that a disaster of this magnitude may not be altogether imaginative.

Such evidence was forthcoming at a recent meeting in Regina, Saskatchewan, under the auspices of the Fish and Game League, when a hundred participants in a contest which called for suggestions for better measures for the conservation of wild life were unanimous on one thing, and that was that there is a noticeable decline this year in the number of migratory birds visiting the province and that this decline has been going on for a number of years.

The evidence was not only applicable to the game birds in which the sportsmen were primarily interested, but extended to the feathered songsters which annually gladden the hearts of residents of city and country. It was stated that they, too, are dwindling in numbers and that their disappearance is only a question of time unless the sportsmen and nature lovers arouse themselves to take the necessary steps to prevent a great disaster.

A Practical Idea

While opinion as to the dwindling numbers of the denizens of woods and open prairies was unanimous, methods which might effectively be applied to stem the process of ultimate elimination were many and varied. Among them were proposals that bag limits be reduced, open seasons be shortened, a closed season of one or two years for all wild life, except of the predatory varieties, be imposed, that game laws be more strictly enforced, and others.

But one of the most intriguing and perhaps practical proposals came in the form of a suggestion that provision be made for the establishment of a wild life sanctuary of one section of land in every township, coupled with the advocacy of the use of this square mile of land, enclosed by a single line barbed wire fence, for practical studies in wild life and manifestations of nature by the students of the schools within the township.

Such a suggestion is worthy of some serious consideration, for it gets close to the roots of the problem—the value of education as a means of conserving wild life, the inculcation of love of bird and beast and fish, together with the development of true sportsmanship and the protective spirit which is inherent in all who observe Nature with understanding and learn to admire her ways.

What child, for example, who has watched the skill with which the parent birds skillfully construct their nests and the loving care they expend in hatching and rearing their young would wish to wantonly destroy the fruits of their pleasure and knowledge? What child to whom the mysteries of Nature have been revealed first hand in this manner would want, when he becomes a man, to take life unnecessarily or to butcher in wholesale manner?

A Certain Sequence

Yes, education will do much to preserve, not only for the present generation but for those yet unborn, the magnificent heritage which has been bequeathed to us by Nature. To know and to understand is to admire and to admire is to protect. It is a sequence which is as unalterable as the laws of the Medes and Persians.

Coincident with the establishment of small but innumerable sanctuaries, restrictive measures might also be in connection with campaigns for the slaughter of predatory birds and mammals, such as the crow, the magpie and the gopher.

It is essential, of course, that those species which prey on desirable varieties or which take heavy toll of crops be destroyed, but children should not be encouraged to take part in such campaigns without proper supervision, lest it lead to indiscriminate destruction of good and bad alike.

An illustration of the evil effects of such unrestricted, unsupervised participation in campaigns of this kind on the part of juveniles was recently reported in a large prairie town where a band of youths went out to take crows' nests and nestlings in the belief that they were doing a good work. In the bag that they brought back to town were not only the remains of crows and crows' eggs, but it was quite apparent that they had destroyed nests, eggs and young of practically every variety of bird inhabiting the district.

Campaigns of this kind when conducted indiscriminately by young people without proper supervision and by youth who are unable to distinguish between species not only may result in irreparable damage to desirable wild life but tend to develop a lust to kill for the sake of killing, thus perpetuating the antithesis of good sportsmanship.

Exploring The North

English Geologist Spends The Winter At Southampton Island

Thomas H. Manning, English geologist, has arrived at Chesterfield Inlet, 325 miles north of Churchill, Man., from Southampton Island where he spent the winter in exploration work, making the trip over the ice for scientific supplies.

He will return to the island, 125 miles east of Chesterfield, immediately, and later proceed to Baffin Bay, where he expects to spend two years in exploration work. He will receive further supplies from the R.M.S. Nascopie at Cape Dorset this summer.

Manning was leader of four young English scientists who went into the Canadian Arctic in the summer of 1936.

Letter From Queen Mary

Showed Personal Interest In Coronation Diary Of Toronto Girl

A book, "Coronation Cavalcade," was presented to Miss Jean Black by Dr. Henry F. Munro, superintendent of education for Nova Scotia, in the Royal York hotel, Toronto. With this book came a personal letter from Queen Mary.

Miss Black, fifth form student of Vaughan Road collegiate, has a 250 page leather bound diary on her trip to the coronation which was read from cover to cover by the Queen Mother.

Students from all over Ontario attended the presentation. Richard Graybiel, son of the general manager of the Windsor Daily Star, received the first prize for the boys' coronation diary.

LAY AWAKE IN AGONY WITH NEURITIS

Kruschen Salts Brought Lasting Relief

Ordinary headaches are bad enough, but they are as nothing compared to the awful pains of neuritis in the head, says this woman. Read how Kruschen completely banished the pain:

"I had neuritis in the head and right arm. I suffered untold agony with my head, and I dare not think what might have happened had it continued. Everybody knows what a headache is like, but it is as nothing compared with the awful pain of neuritis in the head. I spent sleepless nights tossing with pain. I began taking Kruschen Salts, and after some months of the treatment I have effected lasting relief."—(Mrs.) L.M. Neuritis, like rheumatism and sciatica, frequently has its roots in intestinal stasis (delay)—the unsuspected accumulation in the system of harmful waste matter, which leads to the formation of excess uric acid.

Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients of Kruschen assist Nature to expel these dissolved crystals through the natural channels.

Before The Great War

World Was Not Then Enjoying Peace And Stability

Before the outbreak of the World War we must go back a hundred years to the last preceding world war ending at Waterloo. But it is not true, of course, that the world before 1914 was all peace and stability. It is twenty years since the armistice, and we have to reckon with Spain and with Japan in China. Go back twenty years behind 1914 and we have to take note of such sizable events as the Balkan Wars, a South African war and a Russo-Japanese war. Our own skirmish with Spain in 1898 is minor.

Go back another twenty years from 1894 and we encounter a big Russo-Turkish war, or, by stretching the yardstick a few years, can take in the war between Germany and France in 1870. Go back less than twenty years from 1870 and we must reckon with the greatest of all wars between Waterloo and the Marne—our own Civil War tragedy. For sacrifice the war between the States will compare, proportionately, with the World War.

About the same time as our own Civil War there raged in China the so-called Tai-ping rebellion. How many people in Europe and America were excited over the Tai-ping war? Some authorities say it cost 20,000,000 lives. But in those days people did not agonize over Chinese slaughters, as we do to-day by telegraph, cable, wireless, camera and news reel. New York Times.

FOR ANY TYPE OF HOUSE

For inexpensive homes or elaborate mansions, architects and contractors are recommending

GYPROC FIRE PROOF WALL BOARD

for interior walls and ceilings. Owners recognize the many advantages of using GYPROC.

It is Fire-proof—will not burn.

It will not crack, warp or sag.

It provides a smooth, seamless surface—perfect for any decoration.

It speeds up building—is economical.

It costs no more than other and inferior materials. G638

Scientific Marvels

Discs Of Paper Saw Wood With High Speed Motors

Motors operating at 30,000 revolutions per minute and cutting wood with paper discs, high speed turbines spouting jets of steam with a velocity of 23,850 miles an hour, model airplanes battling against man-made gales in excess of 80 miles an hour, and precision instruments capable of measuring within a millionth of an inch, were among the scientific marvels on display April 30 at the annual open house of the University of Michigan.

Among the exhibits were the Otto-Langdon internal combustion engine of 1870, a one-cylinder, four-cycle affair, fired not by a spark-plug, but by a flame from a pilot light. Despite its crudity, the apparatus is said to have been the forerunner of the modern automobile.

The difference between a vertical and a horizontal boxer is ten seconds.

New System For Dentists

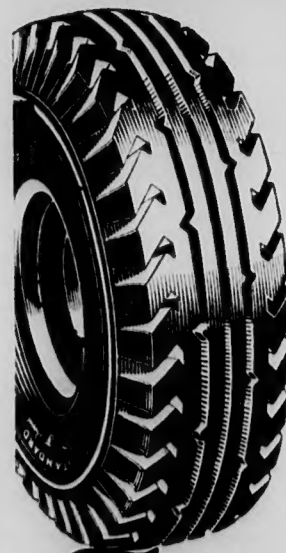

Doctor Has Experimented Seven Years With Twilight Sleep

A new "twilight sleep" during which a fellow may have a tooth drilled or pulled without pain and still remain conscious was demonstrated before the New Jersey Dental Society at Atlantic City, N.J.

Dr. James F. Hanegan, of New York, gave the demonstration, using as his patient a boy selected at random. Through careful regulation of nitrous oxide and oxygen a nurse kept the boy numb and impervious to pain, but yet able to carry on conversation with the dentist. Only the nerve "undines" were asleep, the doctor said.

The boy said he experienced no sensation whatever. Dr. Hanegan said no serious mishaps had resulted during seven years of experimentation with the system and he believed it was now developed to a point where all dentists could use it regularly.

NEW FIRESTONE
Low PRICED Standard Tire

Here is the tire sensation of 1938. New in design, new in appearance, with a new high in Firestone quality at a new low price.

This new Firestone Standard Tire has everything you want—safety, mileage, carefree dependability.

Never before have you seen so much tire for the money. Every tire carries the Firestone name and guarantee—your assurance of greater non-skid efficiency, greater safety and longer mileage.

Before you buy any tire this Spring, first go to your nearest Firestone Dealer and see how he can save you money with this new Firestone Standard—the greatest tire value ever offered at these low prices.

Elements In Fertilizers Have Separate Functions To Perform In Growth Of Plant

Fertilizers are materials which furnish in available form one or more of the three so-called essential elements of fertility in soil, namely, nitrogen, phosphoric acid, and potash. When the material supplies all the three elements, it is known as a complete fertilizer. Experience has shown that plants in their normal growth and development take ten or more elements from the soil. These elements include nitrogen, phosphorus, potassium, calcium, sulphur, magnesium, manganese, sodium, iron, chloride, silicon, and boron.

The available supplies of only three of these elements of plant food tend to become deficient for crop requirements under normal conditions. These elements are nitrogen phosphoric acid (phosphorus), and potash (potassium) and are commonly known as the essential elements of fertility, for the reason that their available stores are more quickly depleted by cropping than the others and therefore must be returned (or furnished), if fertility is to be maintained or increased. Lime (calcium) has also been found to be deficient in many soils, more especially in districts subject to heavy rainfall. In such districts, an application of lime in some form or another may be found essential to productivity; in fact, lime may be the limiting factor of growth for those crops which do not thrive in an acid soil.

Each of these essential elements of fertility has a separate function to perform in the growth of the plant, and, if one is deficient, crop growth will be restricted by the lack of a supply of that element, although the other elements may be present in amounts ample for highest production. In other words, there may be present in the soil all the potash and phosphoric acid that the plant can utilize, with but very small amounts of available nitrogen. Under these conditions, good crops cannot be grown until the deficiency in nitrogen has been overcome. Deficiencies in soil fertility may thus be made good by commercial fertilizers. In Canada all fertilizer is now sold by analysis, and is subject to inspection by the Dominion Department of Agriculture.

Farm Right In London

Area Of 25 Acres Near Charing Cross Is For Sale

A farm of 25 acres, charmingly situated among old trees beneath which Cromwell's men are said to have sheltered, and watered by a stream along which Queen Elizabeth sailed in her State barge, is for sale.

All sounds beautifully rural—but actually the farm is right in London, less than five miles from Charing Cross. No farm is closer to the centre of the city. Continental trains pass its boundaries within a few minutes of leaving Victoria. In the summer hay-making can be seen in progress almost before passengers have had time to settle down in their places.

The farm is on the Belair estate, in Dulwich, which was owned by the late Sir Evan Spicer, Pearson's Weekly.

Had To Change Location

Novelist Obligated To Have Heroine Patronize Berlin Hairdresser

Every book that is to appear in Germany must be submitted to the Reich chamber of literature for approval. A woman novelist recently submitted a novel in which the heroine, on a trip from Athens to Barcelona, stopped off in Paris to avail herself of the services of a famous hairdresser.

On the margin of this passage the Reich chamber official wrote: "Why not in Berlin? We, too, have excellent hairdressers!" The novelist was obliged to make her heroine go a thousands miles out of her way so that she could have her hair done in Berlin. — National-Zeitung, Switzerland.

Features of a huge clock erected at Messina, Sicily, are a bronze lion 12 feet high, which roars at noon, and a cock six feet high which crows at sunrise and sunset.

Congratulated By Royalty

Many Centenarians And Diamond Wedding Couples Request Message

About 745 couples celebrated diamond weddings (60th anniversary) last year in the United Kingdom and 112 men and women joined the ranks of the centenarians.

Ten couples in England celebrated their ruby wedding (70th anniversary) and 14 couples in the Dominions had diamond wedding celebrations, making a total of 769 marriages that have lasted 60 years or more. Ten years ago the total number of diamond weddings was 181 and the total number of centenarians was 67. These figures have been worked out not from insurance statistics, but from the records of messages of congratulations sent by the King and Queen. Actual anniversaries probably totalled more, but these were the numbers sent to the palace.

Every year, hundreds of requests for these messages reach Buckingham Palace. Before the royal congratulations can be sent, documentary corroboration has to be produced and every year a number of cases cannot be checked. Last year, 20 centenarian claims and 68 wedding anniversary claims failed.

Figures going back to 1920 indicate either that longevity and lasting marriages are on the increase, or that more people wish to receive messages from the King and Queen, because from 1920 to 1926, inclusive, only 552 messages—less than 100 a year—were sent on diamond wedding anniversaries and only 245—an average of 35 a year—to centenarians.

Early Planting Not Advisable

Vegetables Grow Quickly When Seeds Go Into Warm Ground

Vegetable seeds vary considerably in regard to the most favorable soil conditions for their growth. Most vegetables do not thrive if planted very early, but make rapid growth if the seeds go into the ground when the soil has become warm. Peas, spinach and lettuce, however, do best when started in cool weather. Lettuce needs a well fertilized, damp soil. Dry conditions retard its growth and make it tough and bitter. Radishes must develop quickly if they are to be palatable. Some gardeners plant radishes along with the seeds of beets, carrots and similar vegetables which are slow in germinating. The radishes are pulled as they mature.

Peas should be planted at intervals of ten days to two weeks so that there will be a constant supply. Parsnips and onions need a long season so should go in early.

An Old Glass Factory

Ancient Glass Works In London Has A History

Few people realize that just outside London is a factory where glass is blown in substantially the same way as it was three or four thousand years before Christ.

Until 15 years ago this ancient glass works was in Tudor street, close to the Observer office, where it had been since the year after the Great Fire.

When, 15 years ago, the Whitefriars—so called from the London neighborhood to which they belonged—moved to the suburbs, they took with them a cutting from the figure tree at the old factory.

It grew and flourishes now outside a structure which resembles those described in sixteenth and seventeenth century treatises on glass-blowing. London Observer.

They Can Take It

How do the British do it? They do it through two things: (1) the enormous wealth of the country; and (2) their ability to tax themselves as no other people do, or can do. Taxes in Britain to-day are at almost unbelievable heights, yet the people seem to take the imposts in their stride. It is that old British way, says the Ottawa Journal.

By the time you are rich enough to sleep late, you're so old you wake up early.

Upkeep Of A Farm

Owner Of One Near Toronto Astonished At High Cost

The following appeared in the Montreal Family Herald and Weekly Star:

When asked if there is any money in farming, a Toronto business man promptly replied, "There must be. I've put plenty into it." He had purchased a few hundred acres near the city and stocked up with pure bred animals. He had a fair run of luck and had the keen satisfaction of winning championships at the Royal Fair. If there were losses, they were not serious, and, taken altogether, the venture might be considered a success. Yet the owner, accustomed to thinking in large figures, was astonished at the cost of upkeep of a farm.

Comparisons with figures obtained in 1891—the first accurate ones obtained in the Government census—reveal how much extra capital is required to-day to purchase and equip a farm. J. F. Booth, of the Economics Branch of the Federal Department of Agriculture, states that the average size of farms was less than one hundred acres in 1891, while now it is over two hundred. This jump is due to a great extent to the development of the west where wheat production demands large scale operations. The most recent change was the introduction of the harvester-combine which replaced man power with machines. With the purchase of 9,000 combines in the period between 1925 and 1929 the demand for harvest labor was reduced to such an extent that excursion rates from the East were abandoned.

Investments in machinery at the earlier date were about \$900 per farm. Recent surveys in Saskatchewan indicate that from \$1,000 to \$2,500 is required for implements. The man who specializes in live stock may save on cultivators, seeders and combines, but he has heavy charges for barns, fences and, in years of shortage, for feeds.

One result of this stepping up is that it is more difficult for the wage earner to advance to the position of tenant or owner. Farm laborers are not paid any better than in the nineties of the last century, and in consequence have a poorer prospect of acquiring farms of their own. It would appear that with so many obstacles in the way of acquiring farms, those already in possession of land may consider themselves fortunate.

His Candid Opinion

The children of to-day are candid, if nothing else. A London lady told this story Easter Sunday: "I started for church with my younger son. He's a very observant young man. The first thing he noticed was my new hat—the new hat I had taken several hours in selecting.

"You going to wear that to church?" my son asked.

"Why certainly," I told him. "Don't you like it?"

"Well," he answered, "all I've got to say is that I hope we don't meet anybody we know."

A girl who was run down by a motorist has announced her intention of marrying him. That'll learn him!

A Young Idea In Jiffy Crochet

PATTERN 6117

Top your Summer afternoon or evening frock with this jaunty bolero which takes no time to make in jiffy crochet. A large crochet hook and two strands of string quickly turn out this lovely lacy jacket. Band it with single crochet. Pattern 6117 contains directions for making bolero; illustration of it and of stitches; materials needed.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Colonel Drew Points To Perils Menacing Democracy In Canada And United States

Colors As Health Aid

Psychological Architect Believes Proper Use Would Transform World

The world could be transformed into an "Utopia" by proper use of colors in the home and for clothing, Miss Grace Cope, Middlesex psychological architect, believes.

Blood tests, she declares, have proved that colors have a striking effect on the emotions and experiments have shown that color and shape in buildings and clothes are important to health and fitness.

"Years ago people thought my ideas mad," she said. "But now they are being accepted throughout the world. Correct combinations of colors develop the mental powers, and make people happier and fitter, and the time will come when people will wear colors to suit their personalities. Then disease and lunacy will practically disappear."

"Doctors tell me that when my work has reached fruition, there will be little left for them to do. My mother, who has only just died, at 103, slept in a peach-colored bedroom that would have almost killed me, but the color undoubtedly helped her to live so long."

Miss Cope believes that ivory or very faint primrose is the best color for studying, and blues best for eating. At night, people should always eat by candlelight, for, she claims, it has been scientifically proved that the rays from a candle definitely aid digestion.

Miss Cope is a member of the Institute of Hygiene and acted as advisory architect to the creation of Turkey's new capital, Ankara.

Unable To Assist

Strange Request Received By Fire Department In Toronto

It was Easter morn in the Fire Department alarm hall, Toronto. Outside, the sun shone warmly out of a clear blue sky—a perfect setting for the Easter parade.

The telephone jangled. Dispatcher Mel Manning lifted the receiver to his ear.

"Fire Department." A feminine voice worried, excited, poured a tale of woe into a sympathetic ear. She sounded desperate. Her words tumbled over each other. Manning lowered his head as he muttered a low "Yes" or "No."

Finally he spoke: "That's too bad, lady. But what can a fire department do. You say there's no fire?" There was a pause, then Manning continued:

"Yes, I know. But we can't go breaking windows unless there is a fire—No, I'm very sorry."

As he hung up, he turned to three silent listeners. "Can you beat that?" he started.

"Some poor girl wants us to smash open a cleaning store on Bathurst street. It was locked last night when she called and her Easter clothes are in there."

Colonel George A. Drew, Canadian soldier, author and lawyer, told the Canadian Club of New York at its annual dinner in the Waldorf-Astoria that Canada and the United States face greater immediate danger internally than from the threat of outside armed forces.

"We are inclined to be too much concerned with the threat of armed force outside our borders and to pay too little attention to the more immediate threat of destruction from within."

Communism and Fascism were named as the agents employed to destroy democracy.

"We have entered a new period of history. Italy conquered Ethiopia. Japan absorbed a considerable part of China, and Germany annexed Austria without any declaration of war. And war is being waged against Canada and the United States to-day by the Russian Government, though no armed troops have crossed our borders."

"International Communism, with all its disguised auxiliary forces, is the Trojan horse with which Russia hopes ultimately to overthrow our governments. In Canada, and I imagine it is the same with you here, other strange doctrines have followed Communism as they have followed Communism in other lands."

Education of young people to have faith in democracy was the prime need if the spread of Communism and Fascism was to be avoided.

The dinner took the form of a personal testimonial to the outgoing president of the club, John A. Noonan, formerly of Leeds, Que. Ernest Appelby, past president and formerly of Saint John, N.B., presided and presented a travelling bag to Mr. Noonan on behalf of the membership.

Edward Johnson, erstwhile choir-boy of Guelph, Ont., who is general manager of the Metropolitan Opera Company, was among the 150 guests.

Streets With Trade Name

Many Odd Ones Have Survived For Centuries In London

One of the London magistrates has been commenting on the odd names of streets lying within the jurisdiction of his court—the particular instance he was dealing with being Pickle Herring Street.

What the derivation of that name is does not appear, but on the analogy of other names of London's streets it probably records the fact that the trade of pickling herrings was carried on there in the centuries which have passed.

Probably these trade-name streets were not in the beginning officially named. Certain trades clustered in them and the names just grew. Thus we have Bread Street, Bakehouse Lane, Milk Street, "Poultry" (street omitted), Pepper Street, and Garlic Hill.

If you want fruit take your choice of Orchard Street, Apple Grove, Orange Street, Pineapple Buildings, Pear Tree Court, Plum Tree Court or Strawberry Hill. Or you can get your breakfast in Ham Yard or Bacon Lane. And you can get drink in Wine Office Court or Beer Street, or even even Water Lane. And a little dose from Camomile Streets will get rid of a surfeit.

Your clothes? Try Silk Street, or Shoe Lane, or Petticoat Lane. A present for your lady? Go to Gold Street, Amber Street, Emerald Street, Diamond Street, Pearl Street, Ruby Street or Jewel Street.

Her Own Version

The producer of a local dramatic society was giving some final instructions before the curtain went up on the first night of the show.

"Now don't forget," he told the heroine, "when the villain takes you in his arms he will begin talking very loudly. But you call out loudly, too. 'Oh, oh, oh! please save me!'"

The heroine was a telephone girl, and she brought down the house when she cried, "Two thousand, please save me!"

During 1935, England produced 17,000 books. This is equivalent to two volumes every hour, day and night, for the year.

The World of Wheat

By H. G. L. STRANGE

Director, Research Department
Searle Grain Co. Ltd.

"My land is badly infested with wild oats. I lose money every year. Can I get rid of them?" a friend asked me.

"Many have done it," I replied, "but it takes a lot of work and patience, and these four principles must be observed."

1. Do not seed any wild oats with the grain you sow.

2. Induce the seeds now in the ground to grow, then kill the young plants by cultivation.

3. Do not plough the field for several years.

4. Do not permit wild oat plants, growing in the field, to set seed.

From my own experience I suggest this method: Summerfallow the field, but permit the wild oat plants to grow to the four leaf stage (when the young plants are easily killed), then cultivate the field and so destroy vast numbers of the plants, then let the wild oats grow up again to the same stage and cultivate again. Do this several times during the season.

Do the same thing early the next year until about the first week in June, then sow oats for green feed, or seed a very early barley. The following year sow a grain crop, and pick by hand, in the field, the few remaining wild oat plants before their heads ripen.

Following factors have tended to raise price: Drought still prevails in Australia -- Switzerland buys Turkish wheat -- Drought causes crop deterioration in Denmark, Portugal, Greece and Great Britain -- Firmer American security markets -- Area to wheat and oats in Greece less than a year ago -- Wet weather retards rice planting in Louisiana.

Following factors have tended to lower price: Argentine linseed and wheat seedling progresses favorably -- Valuable rains in France -- Some recuperation of Italian crops following heavy rains -- Conditions very favorable in Russia and the Balkans -- Required percentage of corn in Italian bread raised from ten to twenty percent -- Harvest begins in U.S.A.

WARNING

Is hereby given against damaging or destroying rural mail boxes, street letter boxes, post office boxes or any other receptacle for deposit of letters or other mailable matter erected by authority of the Postmaster General.

This is an indictable offence under the Criminal Code of Canada punishable by imprisonment.

In all cases where such equipment is wilfully damaged, destroyed or removed, steps will be taken to see that the persons responsible are prosecuted.

By order,
John A. Sullivan, K.C.
Deputy Postmaster General
Post Office Department
Ottawa.

Weekend Rains Help Alberta Crops

Agricultural Alberta entered the last week of May with wheat seeding from 75 to 100 per cent completed and more than half the coarse grains in the ground.

As grain company and wheat pool reports covering activity to May 21 were released they told a story of ideal growing conditions except in the Peace River country and north-west of Edmonton.

In the Peace only light scattered showers have been received and rain is required. There has been sufficient soil drifting to cause damage to seeded lands, estimated at 5 per cent. In the territory between Edmonton and the Peace River rain would be welcome, but crops are making progress and not yet suffering.

From Macleod to north of Lacombe work progressed sufficiently last week to wind up wheat seeding and coarse grains are 40 to 50 per cent sown.

In the extreme southwest corner from Macleod to Lethbridge and south to Coutts there has been some delay owing to cool weather and storms. But even there the wheat is 80 per cent seeded and moisture conditions are described as ideal.

In the lighter soil and drier areas of the province night and day crews last week managed to get 75 to 85 per cent wheat seeded, and with ample moisture in the ground farmers from Medicine Hat to Coronation district are feeling cheerful. Coarse grain seeding is expected to be completed this week.

IN MEMORIAM

PEARSON—In loving memory of David Pearson, who died May 24th, 1936. In all his ways he did his best; His heart was true and tender; He willingly worked for those he loved; Then left us to remember.

Ever remembered by his wife and family.

How Do "Little Savings" Finance Mortgage Loans?

Answer.—Every mortgage loan made by a Life Insurance company is made up of the savings of several policyholders.

Question.—What do these savings represent?

Answer.—They represent the money which thrifty men and women have invested in Life Insurance for the protection of themselves and their dependants.

Q.—What is the average policyholder's share in Life Insurance assets?

A.—Approximately \$571.

Q.—Then it would require most of the accumulated savings of six policyholders to make a mortgage loan of \$3,000?

A.—That is a fact.

Q.—How much Life Insurance money is invested in mortgages?

A.—More than \$382,000,000, in first mortgages on farm, town and city properties in Canada.

Q.—In whose interests are these investments made?

A.—In the interests of more than 3,500,000 Canadian policyholders, most of whom are in modest financial circumstances.

This is the seventh of a series of messages sponsored by Life Insurance Companies operating in Canada. The eighth, to appear in two weeks' time, will deal with Life Insurance as Canada's greatest co-operative business.

Items of Interest

A new policy of making loans direct to municipalities was disclosed in the statement made Friday by Hon. Norman Rogers, labor minister, after supplementary estimates were tabled in the House of Commons. Mr. Rogers, after announcing legislation would be introduced providing additional encouragement to low-cost and low-rental housing, said "legislation will also be introduced to provide low-interest loans to municipalities for self-liquidating projects." Heretofore the federal treasury has dealt only with the provinces. The new policy was recommended by the National Employment Commission.

(George F. Powell, English Social Credit expert, has been given permission by Ottawa to return to the Old Country. Necessity of reporting to English police officers under ticket-of-leave arrangement for his unexpired jail term has been cancelled. It will be remembered that Powell was given a ticket-of-leave after serving half of his 6 months' sentence in connection with the publishing of the "Bankers' Toodles" pamphlet.

Anxious to bring their work cards up to date after six weeks of inactivity due to the "strike," hundreds of Calgary relief recipients reported for work duty on a score of city projects Monday. Shortly before noon, city officials stated that so many men were at work that they had been unable to provide the commissioners with an official count.

Mrs. J. P. Ferguson of Trochu, president of the Alberta Liberal Women's Association, and Mrs. George W. Hagle, Critchley, were named provincial vice-presidents to the new executive of National Federation of Liberal Women of Canada at its convention in Ottawa.

Adequate supervision of forests on the eastern slope of the Rocky Mountains as a protection against fire was urged in the House of Commons by John Blackmore (SC), Lethbridge. He said the forests were owned and controlled by the Alberta government but the Dominion should see there no lack of supervision because of Alberta's present financial difficulties.

A 48-year-old railway car on a siding in Calgary depot of the Canadian Pacific Railway forms a link with the past. One of the oldest cars in railway service, it was formerly the private car of Sir John A. Macdonald, first premier of the Dominion of Canada. Renamed, but changed very little, it is now the private car of R. McKillop, superintendent of the Calgary division of the C.P.R.

Directors of the Bank of Canada have announced a dividend of \$1 1/2 a share, or 4 1/2 per cent, for the current half-year. The dividend is payable on July 2 to shareholders of record May 31.

Grasshopper Control.

The grasshopper pest is menacing this district, especially in the eastern portion of the Mountain View municipality, according to a report issued by the department of agriculture.

The department makes the following suggestions and recommendations for control of the pest:

1. Every few days examine carefully all roadsides, headlands and weedy or abandoned fields. Report discovery of hoppers immediately to the municipal secretary.
2. Do not sow stubble land. If absolutely necessary to seed stubble it should be plowed deeply.
3. Land to be summerfallowed in 1938 should be cultivated shallowly early in the spring to bring egg pods to the surface where wind and sun may destroy them.
4. Plow 4 rod guard strips round all stubble fields. Cultivate such fields from the outside towards the centre, and poison the hoppers on the centre strip.
5. Spread poisoned bait while the sun shines. Hoppers feed only while temperature is between 68 and 90 degrees in the shade.

War Veterans' Allowance

The War Veterans' Allowance Act is intended to relieve, from necessity, the Veteran who is incapable of maintaining himself.

Those eligible, are veterans of the Canadian Expeditionary Forces, or Canadian South African Contingent or Allies, who were domiciled in Canada, at the time of their enlistment.

Veteran must have attained the age of sixty years, or, because of physical or mental disabilities, combined with economic handicaps, be incapable of maintaining himself. If over sixty years he must have served in an Actual Theatre of War, or be in receipt of Disability Pension. If under sixty, he must have served in an Actual Theatre of War.

The amounts payable are a maximum of \$40.00 to a married man and \$20.00 to a single man. In addition, a married man can have income or casual earnings of a further \$40.00 per month, and a single man a maximum of \$20.00 per month.

There is no deduction on property in which a man is living, providing it is not valued at over \$2,000.

The Act will not provide for any man who is in need simply by reason of unemployment. He must have sufficient physical disability to prevent him maintaining himself.

If you feel you are entitled, apply through the Canadian Legion, Provincial Command, 511 Leeson-Lineham Block, Calgary.

DON'T OVER-RATE YOUR BANKER

He cannot perform Miracles

★ ★

There would be more banks than grocery stores all over Canada if banks could perform the miracle of "creating" the means of payment out of nothing.

It is easy to confuse these two things:

- (a) The business of commercial banking, and
- (b) Control of a nation's monetary system.

Commercial banking has to do with the safe-keeping and lending of money and credit.

Control of a monetary system is a matter of national, governmental policy.

Chartered banks finance production and commerce.

Monetary policy in any country is a matter for the national government itself, either directly, or through a central bank.

The Dominion Parliament established Canada's central bank in 1934—the Bank of Canada. Its purpose was declared by Parliament in the very first paragraph of the Act of Incorporation, as follows:

"To regulate credit and currency in the best interests of the economic life of the nation, to control and protect the external value of the national monetary unit and to mitigate by its influence fluctuations in the general level of production, trade, prices and employment so far as may be possible within the scope of monetary action, and generally to promote the economic and financial welfare of the Dominion."

It is for governments alone to determine a nation's monetary policy. Differing conditions of debt and trade may make what is wise for one country unwise for another.

Printing "tickets"—as currency has been called in some sections—entirely out of step with production would make everything you buy cost you more. A Canadian woman living in Germany during that country's inflation in 1923 had to pay 65,000,000 marks for an overcoat, and later 1,000,000,000 marks for a postage stamp!

The business of commercial banking is something to be considered by itself, apart from central banking.

A commercial bank takes deposits. There are two kinds of them. For convenience, call them "savings" and "current". Say you are a workman, or a farmer. After you've paid your living costs out of your wage, or out of the proceeds of your crop, you have some dollars left over. Because you do not want to spend them at once you deposit them in a savings account.

That is a savings deposit. As distinguished from this is the "current" account. Say you are a merchant. You have expenses to meet day by day and therefore always carry a balance in an account against which you issue cheques for your business needs.

That is a current account. Let us say you have \$100 in that account and you need \$1,000 to meet some bills. You borrow it from the bank.

You give the manager your note and he places \$1,000 to your credit as a deposit in your

current account. Immediately your balance goes up to \$1,100—\$1,000 of it being derived directly from a loan.

It is unlike a savings deposit in this respect: You intend to spend it at once. You immediately issue cheques against it. You borrowed the money for business purposes, prepared to pay interest because the transaction was a profitable one to you. Soon most of the thousand has been paid out.

For most of the rest of the term of the loan your deposit is at its lowest. Then, before your note is due, you gather money to repay. Up goes your deposit to its peak again.

Then you repay. Your deposit abruptly drops back to say your original \$100—plus the profit you have made, by the use of the borrowed money.

No matter whether bank deposits are savings or current, your bank must keep on hand cash reserves adequate to meet any demands from day to day.

When its loans are increased, not only is more cash paid out—as was the case with your \$1,000 loan; but your bank's cash reserves also become lower in proportion to total deposits.

A bank must not unduly expand its lending operations, for then its cash will fall below the proportion which experience has shown to be necessary to meet the day-to-day demands of depositors. This very fact serves as an automatic check against excessive lending.

Your bank cannot know just when you will walk in to withdraw your deposit—but it must be ready to pay you, in full, in cash, when you do turn up.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

"JUST ACROSS THE STREET..."

Yes... they're using Gyproc in that new building—all the interior walls and ceilings.

The contractor knows that more and more people are using Gyproc as they learn about Gyproc's many advantages; that it won't crack or sag or warp; that it's made from fire-proof mineral gypsum; that it is permanent. Gyproc is as easy to cut and nail as lumber. Saves time and expense in construction, with no muss or bother.

Yes, I asked him about that—the joints are invisible—the finished walls and ceilings are absolutely smooth—perfect for any type of decorating.

A free booklet tells all about Gyproc for new buildings. Write us to-day.

VANCOUVER CALGARY WINNIPEG TORONTO MONTREAL

WORLD HAPPENINGS BRIEFLY TOLD

Dean of Canadian portrait artists, John W. L. Forster, 85, died of injuries suffered when knocked down by a motor car in Toronto.

Doom of the Austrian National Bank was decreed in a law which extended German monetary and banking legislation to Austrian territory.

Vancouver city council adopted a resolution requesting a federal move to prevent further penetration of Japanese and Chinese into Canada.

Canada's contribution to the upkeep of the League of Nations from 1920 to 1937 aggregated \$4,007,358, according to a return tabled in the House of Commons.

Seventy-five former residents of the western provinces, now living in Toronto, met to organize a Western club. It was agreed the new social club would be non-political.

E. R. K. Fernihough, British holder of numerous motorcycle speed records, was killed in Budapest, in an attempt to regain the world record for the mile from a flying start.

Dominion assistance may be given to a school of navigation at Vancouver, it was announced in the House of Commons by Transport Minister C. D. Howe.

Two war veterans collapsed and died and 200 others were overcome during the annual Anzac day march in Sydney, Australia, commemorating the landing of Australian troops on the Gallipoli peninsula April 25, 1915.

R. W. Cartwright, president of the Natural History Society of Manitoba, was appointed field naturalist for Ducks Unlimited (Canada), T. C. Main, general manager, announced. The organization aims at conserving game.

Toronto this year will launch a three-year plan to free the city of weeds. Thirty gangs of men will clear weeds, particularly ragweed, from vacant lots, parks and fields to make the city more attractive to hay fever and asthma sufferers.

Paid Plenty For Dog

The late Maharajah of Patiala was not the man to do without anything he wanted if money could buy it. When he was in England some years ago he fancied a good-looking retriever. The owner did not want to part with the dog, but succumbed to temptation when it took the form of £1,000.

A San Francisco inventor is in Ottawa with plans for a non-flooding bath tub. Pulling the plug isn't a bad idea, either.

Americans eat the heartiest breakfast of any people on earth. Canadians rank second.

Chinese Value Jade

Stone Is To Them What Diamonds Are To Westerner

During recent years jade has had tremendous popularity. It is greatly prized in the East, especially by the Chinese. It is found in China, Burma and in some parts of Central Asia. But it is the Chinese jade we think most highly of and it is from China that some of the finest specimens come.

Jade to the Chinese is what diamonds were—and still are—to many Westerners. It is to them the most precious of precious stones. Centuries ago this stone, carved in the form of bats and storks, was worn to ensure long life. It varies in color from deepest kingfisher blue—now rare—to white. And occasionally jade of a mauve tinge is seen. In China they gauge the value of jade not by its color but by its texture—the experts "feel" it.

Queen Mary is a wonderful judge of jade and has added many specimens of her own selection to her collection. When the Princess Royal was married she received gifts of jade from the Chinese Government—both white and green. And the little Princess Elizabeth, according to another authority on precious stones, wears a small pendant of jade hanging from a bracelet which was given her by ex-King George of Greece.

The New Zealand "green stone" is also a type of jade, generally much darker in color than the jade necklaces we look upon as the typical color. It is a mascot for gamblers and gives success in any game of chance, particularly in racing. As it is green it was regarded as beneficial in eye troubles. From ancient days down to the Middle Ages it was also supposed to have special powers against kidney and digestive ills. One book says that a great deal of jade is found in Peru and it was worn as ornaments by the natives to safeguard them against those particular ailments when Central America was discovered.

It is, according to one book, the birthstone of people born under the Zodiacal sign of Virgo—birthdays between August 24 and September 22. It is supposed to be unlucky to most others.

Scouts At Windsor Castle

One thousand Boy Scouts from all parts of the British Isles paraded in the quadrangle of Windsor castle before King George, Queen Elizabeth, Princess Elizabeth and Princess Margaret. The queen, stood beside the king. Each of the paraders was a holder of the King's Scout badge or a medal for gallantry.

Visitor: "You have very nice furniture in your house."

Little Johnny: "Yes. I think the man we bought it from is sorry he sold it to us now. He's always calling."

Hard To Exterminate

Larvae Of House Moth Found Often On Furnace Pipes

Moths are household insects general to most of Canada which cause serious losses to clothing. They are usually hard to get rid of, but investigations carried out recently in British Columbia proved conclusively that one of the most important breeding places for the moth in the average Canadian home has been seriously overlooked.

In the home equipped with a hot air furnace in particular and also where pipes run horizontally it has been found that lint, fluff and dust gather, forming almost a felt. Careful examination discloses the presence of moth larvae and other evidences of the presence of many generations of moths. Experiments also showed that after being thoroughly cleaned and reassembled fluff would accumulate in hot air furnace piping in from three to four months to an extent which will provide a new breeding place for moths. To get completely rid of moths in an infested house it is necessary not only thoroughly to sterilize and clean all possible material, but also to be equally careful in thoroughly cleaning out furnace piping.

Civil Servants

Urge Compulsory Retirement At The Age Of 65

Compulsory retirement of all civil servants at age 65 with optional retirement at 60 was favored in resolutions passed at Ottawa at the biennial meeting of the Customs and Excise Officers' Association.

At present the retirement age for civil servants is 65 with the proviso this may be extended to 70 by the minister of the department in which the employee works if it is found he is indispensable to the department.

COOL FROCK ON SLIM LINES

By Anne Adams

No matter how high the temperature, you'll be as cool and crisp as the proverbial cucumber if you choose this slenderizing Anne Adams frock for your summertime wardrobe! Here's a style that is flattering to every matron, from its trim yokes and becoming collar all the way down to its hemline. And there's no question at all about the appeal of the panelled front, button accents, and handy pockets! Easy to make? None easier than Pattern 4796. So get busy on it soon and make it up in a fresh, bright material—gingham, seersucker, novelty crash are all ideal choices.

Pattern 4796 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3½ yards 39 inch fabric. Illustrated step-by-step sewing instructions are included to guide you each step of the way.

Send twenty cents (20c) in coins (stamps cannot be accepted for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

All praise to the hen. She still uses a sanitary wrapper you can remove without profanity.

Power Of The Pen

Writing Is A Great Adventure, According To President Of Authors' Association

One's pen is a very precarious thing to depend on for a living but relying on it is a great adventure, according to Leslie Gordon Barnard, president of the Canadian Authors' Association.

In a world that is sharpening its sword, it is a good thing for the writer to sharpen his pen, that he may have some saving stimulus against indignation over the world's behavior, he told the Canadian Women's Press Club at Montreal.

The power of the pen and of the press mattered tremendously, declared Mr. Barnard, and "we must never take ourselves too seriously and become ponderous." Two essentials in writing, he found, were distinction and vitality.

A Transition Stage

Canadians Are Now Passing Through Difficult Times

Canadians are passing through "a difficult transition stage," Graham F. Towers, governor of the Bank of Canada, said in an address at Toronto.

Canada no longer is a pioneer country, Mr. Towers told the annual dinner of the St. Andrew's College Old Boys' Association. It has changed to a stage of more moderate development which may not warrant large capital expenditures on the scale of the past.

There was likely to be considerable difficulty in governing the Dominion, which is not a pioneer country and which has increased its social responsibilities, he said. Canadians had not yet developed the experience of administering their affairs under these conditions.

A Real Paradise

Conditions In Yukon Ideal Opinion Of Mrs. George Black

The Yukon is a paradise for young or old, Mrs. George Black told the American Women's Club of Montreal, but "you work or starve—man or woman—so long as you are able to work."

Those too old to work, the independent Conservative member of the House of Commons for Yukon said are cared for by the Government.

Lord Byng, former Governor-General of Canada, had told her husband the Yukon was the "most thoroughly socialistic constituency in the world," because of the absence of class distinction and the helpfulness of the people toward one another.

Another Job For Scientists

Russia Building Bathysphere To Explore Ocean Bed In Arctic

Soviet Russia, having explored the Far North from its ice floes and skies, has disclosed plans to send natural scientists into its depths.

A bathysphere, it was announced, is being designed for studies of the herring and cod fishing beds at the bottom of Barents Sea.

It is planned for a crew of three with four large windows through which a motion picture camera could photograph underwater life.

The bathysphere, it was said, would have a diameter of 5.9 feet with walls more than an inch thick and would weigh four and a half tons.

Opinion Of Japanese

Use Of King's Head On Postage Stamps Not Respectful

Rev. Percy Green, missionary for 20 years in Japan, told a Regina audience that the Japanese considered the British people disrespectful to their king for using his head on postage stamp. "You lick the back of your king's head and then pound on his face," Mr. Green quoted the Japanese as saying about the British people. The Japanese use scenic pictures for their postage stamps.

Just His Mistake

Forced to sleep in his yard because the night was close and sultry, Ed. Lucas of Dayville, Ore., was awakened by something that shoved against him. He thought it was his dog and took a well-aimed kick in the dark. But it wasn't his dog, and Lucas spent the rest of the night pulling porcupine quills out of his foot.

Health LEAGUE of CANADA
presents
TOPICS of VITAL INTEREST
by DR. J. W. S. McCULLOUGH

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to—The Health League of Canada, 105 Bond St., Toronto, Ont.

Gardening

In the smaller types of easily grown flowers are alyssum, white and dainty and useful for edging. These will grow in partial shade and make excellent edging plants. Portulaca is a spreading plant with bright yellow, red and pink wax-like flowers. It thrives in bright sunshine and dry soil. Nasturtiums, marigolds, calendulas and petunias will complete a good garden of easily-grown annual flowers. These are all useful for edging beds or walks.

During the early part of the season a little cultivation every week will help plants along wonderfully. The purpose is two-fold. Unightly weeds are killed and valuable moisture is conserved. Growth is hurried along. Later on as the flowers or vegetables develop, it will not be necessary to cultivate so often. Sometimes a mulch of short straw or grass clippings is used to retain moisture during the summer. This mulch is simply spread over the ground between the plants. It keeps the underlying soil moist, open and free from weeds.

Several sowings of each vegetable are advised. Otherwise all mature at the same time and then there will be a feast or a famine. After all, with such things as radish, spinach, peas, corn or practically anything else for that matter, the time they are really worth eating is when they are fresh, that is just mature, and taken right out of the garden. They must be quickly grown and used immediately when they have reached the proper size. These vegetables will deteriorate whether they are left in storage or ripening in the vegetable rows. To avoid this sort of thing, the good gardener has his vegetables coming along continuously, a few feet of lettuce and baby carrots and beets ready for the table all season.

Awarded Damages

Residents Of State Of Washington To Receive Compensation

Residents of the state of Washington who claimed nearly \$3,000,000 as compensation for damages allegedly caused by fumes from the smelter at Trail, B.C., were awarded \$78,000 by the tribunal set up to deal with the matter.

At the same time the tribunal instructed Consolidated Smelting and Refining Corporation, operators of the Trail plant, to maintain a corrective regime designed to prevent any further damage. The tribunal will meet again at the end of 1940 to ascertain if corrective measures have been effective.

More Battleships

Britain Notifies League Of Nations Departure From Restrictions

Great Britain has notified the League of Nations, that she intended to depart from the restrictions on battleship tonnage in the British-Russian and British-German naval agreements because of Japan's navy building programme.

Russia and Germany, in separate agreements, adhered to the 1936 American-British-French treaty, whose tonnage limits the three signatory governments have agreed to exceed.

If You Travel By Water

According to the London Times one would expect to be conveyed by dhghaisa in Malta, by botter in Holland, by dhow on the Arabian coast, by umiak in Greenland, by prahu in Malay, by nobbey in the Isle of Man, and by pram in Norway.

In England, 162,922 factories and 83,110 workshops are registered with the government.

JOYS AND GLOOMS

WHERE'S JUNIOR? I CAME HOME EARLY SO WE COULD FINISH THAT BOAT!

COME ON, GLOOMS, HE LOOKS TOO HAPPY!

WHAT'S THE MATTER, SONNY? WHY THE TEARS?

AW—I HAD TO STAY AFTER SCHOOL AGAIN!

BUT JOHN... HE DOES TRY TO STUDY... BUT HE'S NERVOUS AND HE DOESN'T SLEEP SOUNDLY!

WHY NOT HAVE THE DOCTOR LOOK AT HIM?

HE'S BEEN DRINKING TEA AND COFFEE, EH? CHILDREN SHOULD NEVER DRINK TEA AND COFFEE! GIVE HIM POSTUM—MADE-WITH-HOT-MILK!

BEAT IT, GLOOMS! THAT LICKS US!

30 DAYS LATER!

THERE YOU ARE, SON... THAT'S FOR GETTING THE BEST MARKS IN YOUR CLASS THIS MONTH!

HE'S BEEN A DIFFERENT BOY SINCE HE SWITCHED TO POSTUM!

YOUR MONEY BACK... IF SWITCHING TO POSTUM DOESN'T HELP YOU!

MANY PEOPLE can safely drink tea and coffee. Many others—and all children—should never drink them. If you are one of these, try Postum's 30-day test. Buy Postum and drink it instead of tea and coffee for one month. Then, if you do not feel better, return the Postum container top to General Foods, Limited, Cobourg, Ontario, and we'll refund full purchase price, plus postage. Postum is delicious, economical, easy to prepare, and contains no caffeine.

DON'T BE A GLOOM... DRINK POSTUM!

WHAT HO!

—By—

RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER X.—Continued

"Maybe you think I couldn't get it?" said Mr. Wyncoop. "Why, between us we could raise ten million, twenty million, thirty million—"

"We?"

"Sure. Me, you and Ernie."

"I shall give the matter most serious thought," promised Sir Peter. "Perhaps you'd care to drop in on me in Lombard street when you're in London—"

"I'll be there with bells on," said Mr. Wyncoop. "Let's sing—"

"In a fog-horn voice he carolled—"

"I'm from Iowa, Iowa,

Out where the tall corn grows" rising when he came to the words "tall corn" and raising his hand above his head to show the phenomenal height attained by the crops of his native state.

"Jolly good, that," applauded Sir Peter. "I say, let's get a couple of tenors and form a quartet."

With a champagne bottle under one arm, and Mrs. Clara-Martha Phelps under the other, the Earl of Bingley was making his way toward his study.

"I want you see my snuggery," said the earl. "I've some sporting prints that may interest you."

"Snuggery?" giggled Mrs. Phelps. "Snuggery! What a snuggery word!"

"I brought this bottle of fizz along in case we got thirsty," said the earl.

"Does one get thirzy in a snuzzery?" inquired Mrs. Phelps.

"One does."

Seated, glasses in hand, on a sofa in the study they regarded each other with the eyes of doves.

"I say, do you believe in love at first sight?" asked the earl.

"I?" said the startled Mrs. Phelps.

"I don't mean Cleopatra," said the earl.

"Really, your lordship, I haven't given the matter much thought of late."

"It's not a question of head," said the earl. "Hits you here."

He thumped his stiff shirt in the region of his heart.

"Like champagne?" she asked.

"Just like champagne."

"It must be nice."

"Give it a try," urged the earl. He filled their glasses.

"To my dream girl," he said.

"I believe you're flirting with me," said Clara-Martha Phelps.

"Some girls are as bright as they are beautiful," he said, and accom-

panied his words with a killing glance.

"I can hardly be described as a girl."

"Horseradish!" said the earl. "Mere babe in arms."

"I'm forty-four."

"Just the right age. Im sixty—by the calendar—but twenty-one here—"

Again he thumped his bosom.

"I'm thirzy," said Mrs. Phelps.

"Thirzy? Oh, I see— Here you are."

Again he filled her wine glass.

"Happy?" he asked.

"I haven't been so happy since I was chosen for the daisy chain at Vassar," said Clara-Martha Phelps, dreamily.

The earl raised his glass.

"Here's to knowing you better, toots," he said.

She clinked her glass against his.

"And vice versa, big boy," she said.

Parties end. Morning was stealing into the shoes of night when the earl sped the last guest to bed, and gained his own with only a little assistance from Crump. Soon shores of aristocratic and plebeian origin sounded softly through castle halls.

In his tower room Ernest Bingley was sleeping the sleep of the reasonably just and very tired when something woke him. His eyes flew open and he found himself staring into the muzzle of a pistol pointed straight at his head.

CHAPTER XI.

"Stick 'em up, rat!"

The voice began in an underworld basso and ended in a high pitched squeak.

It came from Master Mervin Wyncoop whose voice was changing but whose habits weren't.

"For heaven's sake, Mervin, put down that gun," exclaimed Ernest.

"It might be loaded."

"Wish it was," said Mervin. "But it ain't. This ole thing can't shoot, anyhow. I busted it."

Ernest recognized the weapon as one of a pair of silver-mounted 18th century duelling pistols and guessed that Mervin had purloined it from its case in the library.

"Loaded or not, please don't point it at me," Ernest said. "Didn't they teach you at military school never to be careless with fire-arms?"

"They didn't teach me nothin'," said Mervin. "And stop squawkin'. I'm only practicin'."

"To be a soldier?"

"Aw, there's no jack in that," said Mervin, and spat on the rug. "I'm goin' to be a big shot and run a racket."

It seemed to Ernest that it would be a good idea to stay on the right side of the scion of the house of Wyncoop. His apple-cart had passed, untipped, through a stormy night, but a few words from this fledgling gangster could dump the pippins into the gutter.

"How do you like staying in a real castle, Mervin?" asked Ernest, wondering how a boy could get so dirty so early in the day.

Mervin expectorated through his teeth before he delivered himself of his views on castles.

"Aw, this crumbly ole shack? We got better bath-rooms in the poor-house back home. Pop and Mom say they're goin' to stick around as long as you'll let 'em, but I sure hope not. It's dead around here and it's got ghosts."

"Surely you don't believe in ghosts, Mervin."

"Naw. But if I seen one, I'd kick the gizzard out of him."

2254

"Who told you about our ghost?"

"Ole Crump. He claims the ghost et a boy once. He was just my age, too."

"I doubt if he'll eat you, Mervin."

"He better not," said Mervin.

"Do you know what time it is?"

"Now?"

"Certainly. Now."

Mervin consulted a new platinum wrist-watch.

"Six past eleven," he said, "and Pop's got a terrible hangover. So has Mrs. Phelps—"

"Not Mrs. Phelps!"

"Well, she's got ice on her head. I seen it through a crack in her door."

He began to drum on the wall with the butt of the pistol.

"Careful," said Ernest. "You'll break it even more."

Mervin gave the wall a few more raps to show he could not be coerced, spat, and said,

"Aw, it's no good. What I want is a machine-gun."

"I saw some nice toy ones in a New York store," said Ernest. "They shoot corks."

"Corks?" Mervin was full of contempt. "I want a real gun that shoots bullets. Dum-dums. I need it."

"Need it?"

"Yeah. To pull a job."

"What job?"

"I got my eye on some swell ice."

"Ice?"

"Aw, dimunds and pearls and junk like that," said Mervin, showing his disgust at Ernest's ignorance of the technical lingo of crookdom.

"Where, Mervin?"

"London."

"In a jewelry store?"

"Aw, I ain't interested in no petty larceny jobs," said Mervin. "The ice I mean is in that ole dump that looks like this one."

"The Tower of London?"

"You get me, bo. They got a glass case full of sparklers any fence would give two-three hundred grand for it. It would be a cinch to heist the clowns that guard the stuff, kick in the glass, glom onto the plunder, and make a get-away in a high-powered car."

"A low-powered car wouldn't do, I suppose?" said Ernest.

"Nope."

"I understand the crown jewels are protected by all sorts of electric alarms."

"I know all about them bugs," said Mervin. "I cased the joint. It's a soft touch."

"What about the Beef-Eaters?"

"Them bozos in the capes? Say, if they got tough we'd knock 'em off with our typewriter—"

"Typewriter?"

"Say, ain't you ever been to the movies? We always call a machine-gun a 'typewriter' so the G-men won't know what we're talking about."

"I see. You'd just mow down the poor old Beef-Eaters. They're quite a few of them, you know."

"So what? We'd have our rids, wouldn't we? Forty-five automatics."

"We?"

"Me and my mob."

"Have you got a mob, Mervin?"

"Yeah. But I need two more right guys," replied Mervin. "So far I only got me and you."

"Not me," said Ernest hastily. Master Mervin made his soft face as hard as he could, and fixed Ernest with narrowed, beady eyes.

"Oh, yeah?" he snarled. "Oh, yeah?"

No Hollywoodian heavy could have done it better.

"Oh, yeah!" said Ernest.

"Lissen, wise guy," said Mervin,

"you play ball with me or I'll sing."

"Go ahead. Start with 'Home, Sweet Home'."

"Aw, when we 'sing,' we mean 'talk,'" said Mervin.

"Spill the beans."

"What beans?"

"Yours."

"I have no beans," stated Ernest.

"Oh, no? I got plenty on you."

Mervin grated-piped in his chameleon voice. "Don't think I'm dumb just because I got flunked outa four schools. I hear plenty."

"Where?"

"Key-holes," replied Mervin, unabashedly. "See this watch?"

"I do, and a very grand one it is."

"Cost seventy-five fish," said Mervin. "Mom give it to me. And Pop's promised to give me a high-powered roadster soon as we get back home. Try and figure out why, you two-tim-in' heel."

"Blackmail and bribery, I suppose," said Ernest unhappily.

"It sure is," agreed Mervin, proudly. "I got the dope on this frame-up. So kick-in—or else—"

"Or else what?" asked Ernest, wondering if he pushed Mervin into the moat it would be accounted more than a venial sin.

(To Be Continued)

Contents Of Windsor Castle

A. T. Barber, Only Man Who Knew Value, Died Recently

A. T. Barber, 80, only man who knew the value of the contents of Windsor Castle—the royal residence, died recently at Hove, England. Queen Victoria commissioned him 40 years ago to evaluate contents of the castle, which included gold plate, works of art, antiques and china. Mr. Barber, an antique dealer who formerly was mayor of Windsor, promised the Queen he would never divulge the findings.

The Same Colonel

Asked if he wanted a microphone, Col. Sir Frank Watney, 68, told the 4th Queen's Old Comrades at dinner in Croydon, England, "I can remember when I could make you jump without a microphone, and I could do it again."

G-Man—"Got away, has he? Did you guard all the exits?"

County Constable—"Yes, but we think he must have left by one of the entrances."

Political Patronage

Speaker Says It Is Unknown In The British Civil Service

Political patronage is unknown in the British civil service and any candidate for appointment who seeks to enlist political support is automatically disqualified, Sir Francis Floud, British high commissioner to Canada, told the house committee on civil service affairs.

In the British scheme there is no appointing of former members of parliament to government jobs and ministers' private secretaries are not absorbed in government service after their tenure of office as private secretary.

Open competitive examination held under the direction of the civil service commission was the keynote of the public service.

This commission was appointed under letters patent by the prime minister and in its personnel comprised of civil servants. It set the examinations, issued certificates of appointment and controlled the internal affairs of the service.

Sixty tin cans a day was a good production figure for a skilled workman when cans were manufactured entirely by hand. To-day machines turn out the cans at a rate of 300 per minute.

Probably the greatest distance chiselled on any milestone is that on one in an old fort near Hamilton, Bermuda. It reads: "London, 3,076 miles." A homesick engineer is believed responsible.

Dentists recommend Wrigley's Gum as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums. Aids digestion, relieves stuffy feeling after meals. Helps keep you healthy! Take some home for the children too—they will love it!

LOCAL & GENERAL

Miss Doris Friesen spent the holiday at her home here.

Knox United Ladies' Aid Tea and sale of pies at the home of Mrs. J. L. Clarke this Saturday, May 28th.

Mr. Cecil Studer, of Calgary, was visiting with his parents several days last week.

Westcott School Minstrel Show tomorrow (Friday) at 8:15 p.m. Adults 25c, Children 15c.

Mr. and Mrs. Eber Crummy, of Olds, were Sunday visitors with Mr. and Mrs. E. J. Moffatt.

Miss Emma Befus, who had been at Dawson Creek for several months, returned here on Saturday.

Mrs. Kaiser and Mrs. Willie, of Olds, visited the Miquelon home on Friday.

Mr. Aylmer Liesemer of Calgary spent the week end with his parents, Mr. and Mrs. J. E. Liesemer.

Potted Plants 50c each, and Seedlings at 25c per basket.—Chambers' Drug Store.

Mrs. W. Morrow of Calgary visited with her parents, Mr. and Mrs. H. M. Reiber, during the week end.

Mr. and Mrs. George Simpson, of Claresholm, called on Mr. and Mrs. Eric Moffatt on Friday.

The regular meeting of the Junior Ladies Aid will be held at the home of Mrs. Ernest Clarke on Tuesday, May 31st at 8 p.m.

Miss Marie Chambers went to Banff on Monday to spend Empire Day with her sister, Mrs. Ben Woodward.

Mr. H. Morgan was in Calgary on Monday making final arrangements for the Alberta Postmasters' convention.

Rev. and Mrs. Geeson are in Edmonton this week attending the sessions of the Alberta Conference of the United Church. They expect to be home on Saturday.

Rain did not stop these boys. Alf Brusso, Tom Royds, Alf Durrer and Frank Moyle started out Saturday for a fishing trip out west.

Mrs. H. H. Ballard and daughter Gwenn, of North Vancouver, B.C., were weekend guests of Mr. and Mrs. R. G. Ady.

Mrs. Gertrude Simons and daughter Gwen, of Calgary visited with Mr. and Mrs. Pete Miquelon last week end.

At the regular meeting of the Canadian Legion on Saturday evening Major Layton will lecture on "Blood Transfusion" to the Legion members and Boy Scouts. All returned men are heartily invited.

Mr. W. T. Pitt, who recently sold his residence to the Alberta Wheat Pool, has moved into the Chas Franklin house on Berlin St. Norman McLeod is moving into the Pitt residence.

Hollywood turns the laughs on itself to give you a super-colossal festival of fun in "Stand-In" at the movies this Friday-Saturday, with Leslie Howard and Joan Blondell.

K. Roy McLean, Optometrist and Optician, 209-210 Southam Bldg., Calgary, will be in Didsbury at the Rosebud Hotel, Monday morning, June 6th.

The broadcast given by the School Orchestra over the Calgary broadcasting station CFAC on Friday evening was much appreciated by local folks. The youngsters acquitted themselves very creditably and many favorable comments were heard.

Mrs. J. E. Huget returned home on Thursday from Vancouver where she visited her daughter, Nelda, who graduated from the Vancouver General Hospital. Mrs. Huget attended the graduating ceremonies and also visited Victoria during her stay at the coast.

Monday, May 30th at 8:30 p.m. in the Opera House, two talking pictures, "China Strikes Back" and "Shanghai Bombed." Added "Germany Invades Austria." Commentary by Arnold Robertson, president of Calgary League for Peace and Democracy. Proceeds of a collection will be devoted towards medical aid for stricken China.

Melvin Notes.

Dance at Melvin on June the 3rd. Calgary Hillbillies.

Mrs. George Little, of Vancouver, is visiting her aunt, Mrs. George Youngs.

Mr. and Mrs. Godfrey Carlson were Sunday visitors with their daughter Mrs. Daniels in Calgary.

Mr. and Mrs. Hugh Morton visited on Sunday with Mr. and Mrs. George Youngs.

Melvin won 2nd prize in softball at Olds on the 24th. They were defeated by Didsbury in the final, 16-0. They beat Calgary Electrics in the previous round.

Melvin's second game of baseball was played with Garfield on Sunday. There were three home-runs, two for Garfield and one for Melvin (Norval Honey). The game ended 24-13 in favor of Melvin.

Burnside Notes

Mr. George Metz was a Friday visitor in the southern city.

Miss Gertie McLean, of the Beaton Beauty Parlor, Calgary, is spending the weekend at her home here.

Misses Rosie and Ardella Bittner, of the southern city, spent the holiday with relatives here.

The picnic on the 24th given by the W.I. was very well attended and the dance in the evening very successful.

Mr. and Mrs. Cecil Cipperley and son, of Calgary, spent the 24th with the former's parents, Mr. and Mrs. C. L. Cipperley.

Mrs. C. R. Liesemer, Dorothy and Pearl, of Calgary, Mr. and Mrs. Melvin Liesemer and daughter and Mr. and Mrs. Arthur Liesemer and daughter, were renewing old acquaintances here on the 24th.

Lone Pine W.I. met with Mrs. N. Eckel on Thursday afternoon last. Mrs. Bert Pross gave an excellent paper on "Agriculture." The draw was won by Mrs. John Viney. An auction sale of articles contributed by the members added much fun to the proceedings. Mrs. Joe Clarke was appointed delegate to the W.I. constituency conference to be held in Didsbury on June 11th. The next meeting will be held at the home of Misses Mina and Hazel Viney, with Mrs. John Viney as assistant hostess.

At the Movies.

"Stand-In" Shows the Funny Side of Film Making.

A chance to take a peek behind the Hollywood scenes—and laugh yourself happy—is provided by "Stand-In," the sidesplitting Walter Wanger comedy, starring Leslie Howard and Joan Blondell, at the Opera House tomorrow and Saturday.

Adapted to the screen from Clarence Budington Kelland's Saturday Evening Post Story, "Stand-In" tells the story of Mr. Atterbury Dodd, the shy young banker who went to Hollywood, took over a \$10,000,000 studio and tried to run according to the science of mathematics.

Joan Blondell has her finest role as the "Stand-In" of the title, who helps the bewildered Mr. Dodd over the Hollywood hurdles, falls in love with him and makes him realize that there are other things in life beside adding machines.

Humphrey Bogart plays Quintain, the genius producer who is struggling against the handicap of Koslofski, the fabulous foreign director, and Thelma Cheri, the glamour star, who are conspiring with Nassau, a rival producer, to wreck the company.

Alan Mowbray has his maddest and funniest role as Koslofski, Maria Shelton, the lovely new Wanger discovery, plays Cheri, C. Henry Gordon is his usual villainous self as Nassau and Jack Carson, an unknown "bit" player, won overnight fame in the role of Potts, the pesky press agent.
